

## **DATA CENTERS CANADA TORONTO NORTH DATA CENTER EXPANDS TO 20,000 SQFT**

Vaughan, Ontario Canada – December 12, 2011 – Data Centers Canada a data center provider which operates, develops and manages Canadian real estate for the purpose of providing turn-key data center solutions including colocation and disaster recovery solutions for enterprises, today announced that it has begun construction on expanding its Toronto North Data Center Facility.

The Toronto North Facility which is located in the Greater Toronto Area in the City of Vaughan, will be expanded to approximately 20,000 square feet with its Phase 4 POD expansion.

“We continue to invest in the expansion of our facilities.”, commented Tony Di Benedetto, Managing Partner at Data Centers Canada. “Our Toronto North Facility has grown substantially over the past year and we continue our focus on building quality wholesale colocation space in the Canadian geography”.

The Phase 4 POD environment includes a mixture of private cabinet and cage environments and can accommodate up to 300 watts per square foot power density. All major Canadian network providers are available on-premise at the Facility. Three Managed-Meet-Me-Rooms within the Facility provide access to Canadian and global fiber networks. Tenants also have access to Data Centers Canada multi-homed BGP platform which encompasses a mixture of global networks and peers.

The Facility expansion will utilize a combination of high efficiency and green data center power and cooling technologies. Data Centers Canada is focused on its green data center program in collaboration with PowerStream the second largest municipally-owned electricity distribution company in Ontario. Green technologies such as; free air cooling and air containment / air distribution systems will be built into the data center environment.

It is anticipated that the Phase 4 POD construction will be completed by March 2012.
